# TRAUMA FIRST AID KITS

PUBLIC ACCESS BLEEDING CONTROL KITS | ANSI WORKPLACE FIRST AID TRAUMA KITS

COMMUNITY  
PREPAREDNESS

*The first person on scene  
IS the first responder...*

# Are YOU Prepared?

3 to 5

# MINUTES

*The Difference between Life and Death*

- ▶ A victim who is bleeding can quickly die BEFORE professional emergency responders can even arrive on the scene
- ▶ Serious bleeding accounts for 35% of prehospital deaths from traumatic injuries
- ▶ Life-threatening bleeding warrants immediate intervention
- ▶ Basic bleeding control provided by bystanders can often be the difference between life and death...

*Kit shown:  
Class B Trauma &  
First Aid Kit-Hardcase  
see page 4*

**\*FACT:** from 2000-2020,  
**45%** of **ALL Active Shooter Incidents**  
 occurred in **Places of Commerce**

*Death from Uncontrolled BLEEDING can occur in as little as 3 to 5 Minutes*

Trauma is a national health problem and after a traumatic injury, serious bleeding is responsible for over 35% of prehospital deaths.\*\* Causes of trauma can range from natural disasters, falls, traffic, industrial, and workplace accidents to intentional acts of violence such as shootings, stabbings and bombings. In fact, according to data collected from 2000 to 2020, the U.S. Department of Justice found that the workplace is the most likely location of an active shooter situation.\* Because these traumatic injuries often result in uncontrolled bleeding,

immediate intervention – even before emergency medical services or other first responders can arrive – is critical to avoid potential death. **North American Rescue®** is leading the way to equip bystanders and initial first responders with the essential medical gear needed to take immediate action in life threatening emergencies. These lifesaving modular aid components are designed for individuals or groups in the workplace, public buildings, and populated public areas to administer immediate bleeding control at the point of wounding.
