

# K-9 Tactical Field Kit

**Designed for the Handler or Medic to deliver lifesaving treatment to a wounded canine at the point of injury**

The K-9 Tactical Field Kit from North American Rescue is designed to enable handlers to provide lifesaving treatment to injured canines at the point of injury or when veterinary care is not immediately available. Necessary tools included address major traumatic injuries common to K-9's operating in the military and law enforcement environment as well as common K-9 emergencies such as bloat, heat injury, and toxic ingestion.

Offering a large central compartment and multiple attachment points, this kit maximizes storage space while maintaining a compact profile. The kit can be slung over the shoulder in bandolier fashion, hand-carried, or worn around the waist as a belly-bag.
