## Strong and Dependable...

A dynamic wheeled backpack that accommodates personal, tactical, or medical equipment with equal ease. Offering alternatives on two levels-when packing contents and again when transporting them - this luggage carrier is the ultimate multi-tasker.

For storing contents, the M.U.L.E. has a large main compartment coupled with mesh pockets on the inside lid to provide maximum storage for critical items. For fast access, the outside of the bag has expanding pockets with open channels (strategically located at both ends) and two padded medium-sized pockets (on the front).

For transporting contents, this bag has a durable telescoping handle and rollerblade wheels. For occasions when a wheeled bag is not suitable, suitcase-style carrying handles are located on the top and side. Finally, padded rucksack-style shoulder straps (hidden when not needed) provide a quick and comfortable transport alternative.

When wheeled luggage is preferred but not necessarily practical, the M.U.L.E. is a perfect solution. It offers roomy dimensions of 26 by 22.5 by 12-inches for a 7350 cubic-inch capacity, all for a slight 12.25 pounds.

Its rugged construction of heavy-duty, water-resistant 1050 Denier fabric with YKK zippers throughout offering both flexibility and reliability.
