

FIELD BLOOD TRANSFUSION KITS

“The advantage of the direct transfusion of human blood in cases of severe haemorrhage which we encounter in the emergencies of military surgery cannot to our minds, be overestimated.”¹

The above comment, from a paper presented by Lieutenant Colonel A. Primrose of the Canadian army Medical Corps in 1916, remains as pertinent today as during those earlier days of military transfusion medicine...

The Field Blood Transfusion Kit (FBTK) from North American Rescue® is a comprehensive kit providing all the needed supplies to allow the user to rapidly perform a field blood transfusion. The Transfusion of fresh whole blood is the best option for the management of casualties with hemorrhagic shock. Blood transfusions have been used successfully in military conflicts and other austere conditions to resuscitate trauma patients suffering from shock due to hemorrhage. Developed with extensive research and feedback from the Armed Services Blood Program Program Office the Fresh Whole Blood Transfusion Kit contains the supplies and materiel needed to test for ABO/Rh compatibility and perform a fresh whole blood transfusion in a sealed package.
