

BLOOD SURVEILLANCE MODULE KIT

REV110723

“The advantage of the direct transfusion of human blood in cases of severe haemorrhage which we encounter in the emergencies of military surgery cannot to our minds, be overestimated.”¹

The above comment, from a paper presented by Lieutenant Colonel A. Primrose of the Canadian army Medical Corps in 1916, remains as pertinent today as during those earlier days of military transfusion medicine...

When performing field blood transfusion it is important to test the donor for any blood borne diseases. The Blood Surveillance Module contains the items needed for the end use to collect the donor’s blood for testing. When this module is paired with the Field Blood Transfusion Kit- Basic (FBTK-B) item number 83-0022, the end user is provided with all the needed supplies to rapidly perform a field blood transfusion.

¹ Primrose A, Ryerson ES. The Direct Transfusion of Blood: Its Value in Haemorrhage and Shock in the Treatment of the Wounded in War. Br Med J. 1916;2:384–386.

Specifications:

- Collect and screen blood sample while in the field
- Compact packaging for a small footprint
- Pair with the Field Blood Transfusion Kit- Basic to rapidly perform a field blood transfusion

▪ Dimensions:

- L 9.5 in. x W 14 in.
- Weight: 5 oz.

FBTK-B

Rx ONLY
