

M-FAK *US & TX LawShield*

REV122023

The M-FAK, Mini First Aid Kit, was designed in conjunction with US & Texas LawShield to be the most compact individual first aid kit for delivering immediate critical care for penetrating, blast or other traumatic injuries. This multi-use IFAK is the smallest of its size in our product offering. Despite its size, this innovative kit includes all essential equipment needed in order to treat penetrating trauma at the point of wounding. This M-FAK features convenient exterior attachment points compatible with any standard MOLLE/PALS style connection system for mounting in the standard vertical position as well as a 3 in. internal sleeve for accommodating horizontal attachment to your duty belt. The vertical mount can be set to open left-to-right or right-to-left based on shooter preference, while the horizontal mount on a belt allows opening directly to your C-A-T.[®] tourniquet.

Features:

- Mini First Aid Kit designed in conjunction with US LawShield
- Super compact, rugged nylon platform that allows attachment both vertically and horizontally
- Contains essential critical point-of-wounding medical equipment for treating penetrating, blast or other traumatic injuries
