

# REVOLVER CARABINER

# RESCUE

## Works Like a Small Pulley...

The revolutionary design of the Revolver carabiner significantly reduces friction, rope drag and rope wear and works mechanically in your favor.

Using rolling friction rather than the sliding friction of a conventional carabiner, this very versatile piece provides multiple options in terms of rigging hauling systems or improvised rescue, as it works just like a small pulley.

## Features:

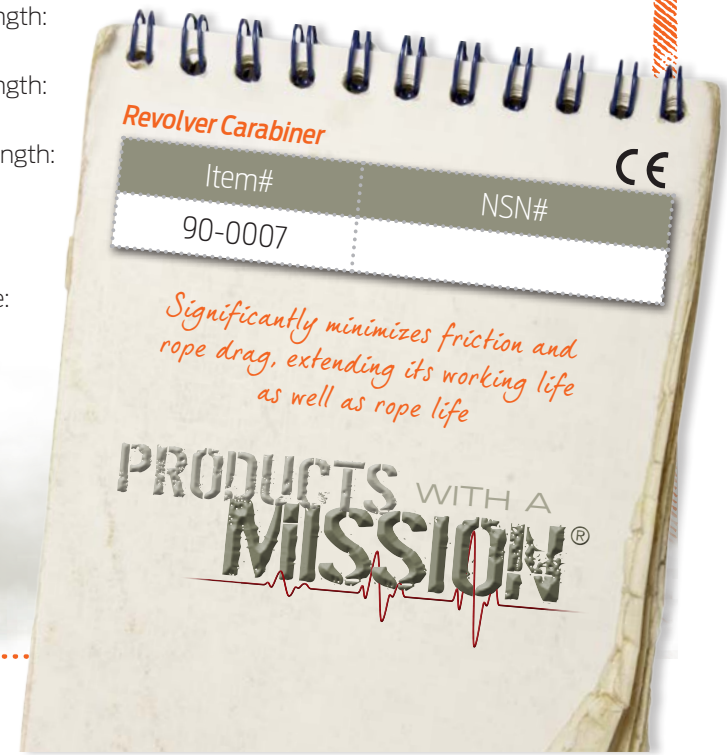

- Unique roller insert performs as an emergency pulley
- Easily accommodates ropes up to 11mm in diameter
- Significantly minimizes friction and rope drag, extending its working life as well as rope life
- Easy-to-clip, lightweight wire gate offers a wider opening than a traditional gate, reducing gate lash-back
- Innovative design can be used in lightweight rescue, hauling and rigging applications
- Exceeds UIAA and EN requirements for both carabiners and pulleys

## Strength:

- Major Axis Loading Strength: 5395 lb (24 kN)
- Minor Axis Loading Strength: 1573 lb (7 kN)
- Open Gate Loading Strength: 2023 lb (9 kN)

## Dimensions:

- Gate Opening Clearance: 24mm
- Weight: 1.6 oz
