

TRAUMA & FIRST AID KITS RESUPPLY - CLASS B

The workplace First Aid Kits that exceed ANSI/ISEA Z308.1-2021 for Class B...

The Class B Trauma & First Aid Resupply Kit from North American Rescue® is designed to refill our portable First Aid Kits for the workplace. Our kits not only meet ANSI/ISEA Z308.1-2021 Standard for Class B kits, but exceed the ANSI and OSHA standards by adding additional bleeding control elements. This kit offers the ability to treat the most common workplace injuries with the added benefit of being able to control major bleeding with the C-A-T® Tourniquet, the safest and most effective Pre-hospital tourniquet on the market today.

Available hemostatic options include QuikClot® Bleeding Control Dressing or Celox™ First Aid Hemostatic Dressing. These dressings add the premier hemostatic gauze to stop bleeding of superficial wounds, minor cuts, and abrasions.

The Trauma and First Aid Kit-Class B resupply kits are a convenient way to ensure that you have all the equipment necessary to restock your kits as consumable items are used. Each resupply kit comes in a resealable plastic bag for convenient storage.

FEATURES/SPECIFICATIONS

- Workplace first aid kits that exceed ANSI/ISEA Z308.1-2021 Standard for Class B kits
- Able to treat the most common workplace injuries with the added benefit of being able to control major bleeding with the safest and most effective Tourniquet on the market
