

OLYMPUS SERIES *Pegasus Ropes®*

Ideal Rope For Use In Challenging and Abusive Environments...

Canyoneering, mountaineering and caving represent some of the most challenging and abusive environments for safety equipment on the planet.

NAR has designed a line of durable, lightweight and great handling ropes that offer reliability in all weather conditions. Whether it's raining, submerged in salt water or -40°F, Pegasus ropes always perform.

Olympus is engineered for rough terrain and sharp edges by offering a thick and highly twisted Technora sheath for added strength and excellent abrasion resistance. The Innegra core is ultra-lightweight and strong, allowing the rope to have a dependable core that is so bouyant that it floats with the thicker sheath. Combining these two high performance fibers creates the ultimate in advanced rope performance.

PEGASUS™ cores are all designed with Innegra™ S, a new and innovative advanced fiber that gives Pegasus ropes the same physical & mechanical properties – whether wet, dry or even exposed to chemicals. This breakthrough technology has an impressive strength-to-weight ratio, making it the lightest structural fiber available today. Innegra's unique composition also provides great thermal properties when used in hot or cold environments. For the first time you can be confident that the backbone of your rope's system, your core, will perform regardless of environmental challenges.

Olympus Series™ Pegasus Ropes®

Dia.	Color	Runner	Item#	NSN#
9.5mm	GOLD	BLK/RED	90-0401	
11mm	GOLD	BLK/BLU	90-0400	

*Offers reliability in all weather conditions
such as rain, salt water or even -40°F*

PRODUCTS WITH A
MISSION®

Features:

- Ideal rope for use in challenging and abusive environments such as canyoneering, mountaineering and caving
- Durable, lightweight, great handling ropes offering reliability in all weather conditions such as rain, salt water or -40°F
- Easy to knot, store & deploy with low stretch/high strength-to-weight ratio – wet or dry
- Thick, highly twisted Technora sheath for added strength and excellent abrasion resistance with ultra-lightweight, strong Innegra™ core for reliable strength, durability & flotation whether wet, dry or contaminated
- Remains buoyant even with a 62% Technora sheath (9.5 mm) and 60% Technora sheath (11mm)

9.5mm Rope Specifications:

- Diameter: 9.5mm
- Weight: 3.82 lb per 100 ft
- Elongation: 1.6%
- Tensile Strength: 5,495 lbf (24.4 kN)
- Fibers (core/sheath): Innegra™/Technora
- Sheath Ratio: 62% Technora

11mm Rope Specifications:

- Diameter: 11mm
- Weight: 4.99 lb per 100 ft
- Tensile Strength: 6,834 lbf (30.4 kN)
- Fibers (core/sheath): Innegra™/Technora
- Sheath Ratio: 60% Technora
