STB BLEEDING CONTROL KITS

The top cause of preventable death in trauma is bleeding ... 20% of people who have died from traumatic injuries COULD HAVE SURVIVED with quick bleeding control!

Life threatening bleeding can occur from emergency situations in our communities everyday. From vehicle crashes and incidents involving farming equipment or public transportation to accidental injuries from natural disasters like tornadoes or inflicted injuries from intentional acts of violence like shootings and bombings, uncontrolled bleeding can result in death within minutes - even before emergency medical services or other emergency responders can arrive. These first minutes following a traumatic injury are crucial in saving a life.

To address today's growing concerns, North American Rescue has designed these convenient kits to equip bystanders with the essential medical tools needed to take immediate action in life threatening emergencies. Contained in a ruggedized, Nylon or vacuum-sealed pouch, these life saving kits provide intuitive and easy-to-use tools that are proven to help to save lives, such as the same Tourniquet and Hemostatic Dressing technology recommended by the U.S. Military & the American College of Surgeons Committee on Trauma to control bleeding. Also included are step-by-step illustrated "Just in Time" pictorial instructions.
