

# TRAUMA AND FIRST AID ESSENTIAL BLEEDING CONTROL KIT

## Supplements First Aid Kits to Comply with ANSI/ISEA Z308.1-2021 Standard

The Trauma and First Aid Kit Essential Bleeding Control Kit from North American Rescue is designed as a portable First Aid Kit for the workplace that can supplement first aid kits that lack the critical items included in the updated ANSI/ISEA Z308.1-2021 Standard. This kit offers the ability to control major bleeding with the C-A-T® Tourniquet, the safest and most effective tourniquet on the market. Packaged in a convenient vacuum sealed pouch that is easily transported to the patient's side, the contents are protected from moisture and dust contamination. The included Emergency Survival Blanket provides body temperature control and hypothermia prevention. This Essential Bleeding Control Kit is a great addition to existing first aid kits - providing the additional equipment to address major bleeding. Be prepared for catastrophe in the workplace environment!
