

# MINI TRAUMA AID KIT

(MINI-TAK)

## Ultra Compact Kit Designed To Be Paired With A Tourniquet Holder And Genuine C-A-T® Tourniquet

The Mini Trauma Aid Kit (Mini-TAK) delivers the smallest platform in the North American Rescue® line up. The M-TAK is designed around the everyday needs of a Law Enforcement patrol officer. This ultra compact kit includes the same life-saving gear as our individual aid kits, but with an even smaller form factor. Designed to be paired with a tourniquet holder and genuine C-A-T® Tourniquet (sold separately), the Mini-TAK is the perfect lifesaving and space saving solution for daily wear.

The pouch / sleeve features MOLLE / PALS connection system for securing to compatible vests, larger bags, or belts in order to provide rapid access. Included inside the pouch is the removable shock cord panel that closes with a hook and loop connected flap to ensure contents are protected and secure within the pouch. When lifted, the flap becomes an easy grip for rapidly removing the shock cord panel to access the contents. Constructed with durable nylon and emblazoned with a sewn medical cross for easy identification in the field.

### FEATURES/SPECIFICATIONS

- Newest and smallest platform in the North American Rescue® lineup
- With the removal of the C-A-T® Tourniquet, the Mini-Tak is even more compact than our popular ROO® and M-FAK platforms
- Designed to equip everyday Patrol Officers with critical point-of-wounding medical equipment for treating penetrating, blast or other traumatic injuries in the line of duty
