

R.E.E.L. NON-RIGID LITTER

(RAPID EXPEDITIONARY EVACUATION LITTER)

The Rapid Expeditionary Evacuation Litter (R.E.E.L. Non-Rigid Litter) is a compact cost-effective casualty evacuation platform that features a full-size, durable, lightweight nylon construction with a load carriage capacity of 700 lb. Conveniently packaged in a low cube, vacuum sealed pouch, the R.E.E.L. features eight (8) easy to grasp carry handles spaced appropriately on the litter to accommodate various size rescue teams.
