

NAR® K-9 HANDLER IFAK KIT

The NAR K-9 Handler Kit is designed to enable handlers to provide lifesaving treatment to injured canines at the point of injury or when veterinary care is not immediately available. This kit and its contents are streamlined, durable and allow the K-9 handler to carry an individual first aid kit that can be utilized for rendering care to the handler, their canine or other injured persons.

The NAR K-9 Handler Kit provides the necessary tools to address the major traumatic injuries seen in working dogs as well as other standard canine emergencies such as bloat or heat injury. Small size allows for easy attachment using MOLLE/PALS style connectors to the assault vest/body armor or can attach to a Quick Detach Panel for fast, easy removal of entire kit (available for separate purchase).

FEATURES/SPECIFICATIONS

- Rugged IFAK for point of injury care to canines and/or humans
- Address K-9 emergencies from major bleeding to bloat or heat injury
- MOLLE/PALS to assault vest/body armor for easy attachment
- Includes the fastest, safest and most effective prehospital tourniquet in the world, the C-A-T® – for treating handlers or injured humans
- Compatible with NAR® Quick Detach Panels (sold separately).
