Middle hinge design allows contouring to the body

A Contoured Fit For Room Breaching And Clearing.

The Medic Assault Rescue Kit is our newest compact, low-profile trauma & rescue aid bag. This bag is unique because it is designed with a middle hinge, allowing a contoured fit for room breaching and clearing.

Two main bag compartments are accessible from each end of bag independently. The front of the bag has two large front pockets with full MOLLE on the exterior. Inside, there are four large mesh inner pouches that are secured to the bag interior with hook & loop attachment and provide organization via removable hook & loop labels for customization. The Basic Rescue kit comes with two Bleed pouches, one Splinting pouch, and one Airway pouch. The Advanced Rescue kit comes with two Bleed pouches, one IV pouch, and one Airway pouch.

MOLLE on back and bottom of the exterior of the nylon bag provides additional carry capability. All silent zipper pulls. Removable backpack straps allow attachment directly to body armor if desired (requires additional straps/hardware – not included).

Available in six 500D Cordura colors, including MTC Alpine.

MEDIC ASSAULT KIT
