

TECHLINE TRAUMA BLEEDING INTERVENTION TRAINER

LACERATION

The TechLine Trauma® Laceration Bleeding Intervention Trainer is a mobile solution specifically designed for point-of-injury trauma simulation and hemorrhage control. The system incorporates a versatile fluid delivery mechanism, featuring a fluid bag that supports both gravity-fed and manual pump operation, allowing precise control over the delivery of simulated blood.

The TechLine Trauma® Laceration Wound in a Box® task trainer simulates a deep laceration to soft-tissue, used to instruct students in proper wound packing technique. The representative skin and tissue of the product is constructed of high quality silicone rubber, with layers of coloration that provide a depth and realism to the product. The PATENTED construction with SOFTTECH® materials a realistic feel, and is very durable and UV resistant. Blood tubing is integrated into the construction to easily create simulated blood flow. The task trainer is contained in its own storage case.

Manufactured by TechLine Trauma®

FEATURES/SPECIFICATIONS

- Easily transportable, yet rugged enough for classroom and field use
- Set up/ Break down in less than a minute
- Highly Adaptive Bleeding Control
- Focused Hemorrhage Control Training
- Patented materials give this product a realistic feel, while still being durable and UV resistant

BLEEDING INTERVENTION TRAINER - LACERATION

ITEM #	NSN

DIMENSIONS

- Measurements (Exterior): L 18.5 in. x W 14.06 in. x D 6.93 in. (47 cm. x 35.7 cm. x 17.6 cm.)
- Weight: 14 lbs.

TECHLINE TRAUMA BLEEDING INTERVENTION TRAINER

LACERATION

KIT INCLUDES:

CONSTRUCTION

The representative skin and tissue of the Laceration Wound in a Box® Simulator is constructed of high-quality silicone rubber, with layers of coloration that provide a depth and realism to the product. In addition, the SOFTTECH® material has a realistic feel, and is very durable and UV resistant.

OPERATION

The Laceration Wound in a Box® is contained in its own storage case. The task trainer reinforces wound packing technique for this unique mechanism of injury. Built within a durable Pelican 1500 case, this durable trainer offers two stands for fluid reservoirs to simulate massive hemorrhage.

MAINTENANCE

The device should be rinsed in clean, warm water and allowed to dry before storage. The simulation may be removed from the storage case for cleaning. The device may be washed with mild detergents like dish soap. Allow the device to dry fully before storage to prevent mold or mildew growth.

KIT CONTENTS

- 1 x Wound in a Box - Laceration
- 1 x Blood Supply Pump with Carry Bag
- 1 x Bladder Mounting Rod
- 2 x Simulated Blood - 8 oz.
- 8 x NAR® Wound Packing Gauze
- 2 x QuikClot® Combat Gauze Trainer
- 1 x Portable Bleed Tray
- 1 x Pelican Hard Case
