

ELASTIC WRAP BANDAGES

The Elastic Wrap Bandage is designed to provide support and compression during recovery and return to activity. Available in widths of 2, 3, 4 and 6 in., these latex free compression wraps are comfortable to wear for extended periods of time, easy to use, and adjustable for a custom fit. They provide a moderate level of support, and are ideal for securing hot/cold packs, splinting, sprains, strains, swelling, and general soreness.

Due to global supply chain delays, we may temporarily substitute similar items where necessary because of excessive product lead times.
