

TECHLINE TRAUMA IV IN A BOX SIMULATOR

The Techline Trauma® Wounds in a Box® series offers cost effective, compact solutions for skills training. Easy to transport, yet rugged enough for classroom or field use.

The IV in a Box™ task trainer allows for easy replacement of the simulated blood line. Pre-filling the clamped line with simulated blood provides a “flash” for the user upon needle insertion. The unique design allows for a realistic feel.

The representative skin and tissue of the IV in a Box™ is constructed of high quality silicone rubber, with layers of coloration that provide a depth and realism to the product. The PATENTED construction with SOFTTECH® materials a realistic feel, and is very durable and UV resistant.

Manufactured by Techline Trauma®
