

HEADREST IFAK BAG

The Headrest IFAK Kit bag was designed to provide personnel with an easily accessible and quick to deploy medical pouch that mounts easily to a vehicle's headrest. The large elastic band keeps the kit bag stowed securely, while the adjustable attachment straps keep the kit tight against a headrest. The durable side pull handles allow for the kit bag to be rapidly deployed from either side of the mount. The 550 cord zipper pulls are reliable and allow for quick access to the bag's contents.

The kit's bag is sized to fit the essential components of an individual first aid kit, either packed individually or in a vacuum sealed bag. This headrest kit bag can carry the basic life support equipment needed during medical emergencies. The multiple interior elastic loops allow for the contents to be organized and secured.
