

SORITE® DECON

SoRite® DECON: Fast, Safe, and Effective. When it has to work, it's SoRite®.

SoRite® DECON is the only proven solution that oxidizes fentanyl, heroin, meth, xylazine, and other narcotics in just 60 seconds—safely, effectively, and without Personal Protection Equipment (PPE). This patented, ready-to-use formula harnesses low-toxicity sodium chlorite to oxidize dangerous drug residues without harming skin, gear, or surfaces. Built for law enforcement, first responders, and high-risk environments, SoRite DECON is non-toxic, non-corrosive, fragrance-free, and requires no mixing.

This isn't just cleaning—it's frontline defense in the opioid crisis. With fentanyl now the leading cause of death for Americans 18–45, SoRite DECON gives you a simple, proven protocol to respond quickly and safely. Third-party DEA-accredited labs using LCMS and H1NMR testing confirm its effectiveness.

Available in ready-to-use towelettes, bag-on-valve canisters, and liquid, it's ideal for patrol kits, ERs, jails, transport vehicles, and more. Train your team in our "Cloak It. Soak It. Bag It." protocol and be ready when it counts.

SoRite® DECON: fast, safe, and effective. When it has to work, it's SoRite®.
