

SALTY BRITCHES® SKIN BARRIER OINTMENT 2 oz.

The Skin Barrier That Will Last Longer Than You

New Military "Blacked Out" Edition Package of Salty Britches Skin Barrier Ointment. This product offers soothing, long-lasting barrier against skin irritation from windburn, friction, chafing, and blister generating activity caused by skin-on-skin, gear-on-skin, or clothing-on-skin movement. Apply once, and it lasts all day without sweating off or rubbing off. Our specialized formula prevents and soothes skin irritation all year round - from dry winter skin to summer outdoor activities.

The tubes are made from 50% PCR Material - PCR stands for Post Consumer Resin, a recycled plastic. PCR plastics are the recycled materials from existing PET bottles and other plastics. The PCR is sourced from single use packaging, and in particular milk packs that have entered into the recycling channel. Using PCR is beneficial for carbon footprint reduction, lighter weights and savings in energy and material consumption, benefiting the planet.

Salty Britches Skin Barrier Ointment is now Dermatologist Tested and Approved!

FEATURES/SPECIFICATIONS

- Designed to prevent and soothe chafing
- Works in amphibious operations
- Long lasting protection that doesn't require constant re-application
