

# SMRT TRAINING KIT ASSEMBLAGE - SOCOM TC3

STRATEGIC MEDICAL RESEARCH AND TRAINING

The Level 3 SOCOM TC3 Training Kit Assemblage is a highly portable field training kit that addresses all core Tactical Combat Casualty Care (TCCC) hemorrhage control and airway skills.

This training package is mobile and facilitates and enhances field training specific to Special Operations Command (SOCOM) units as well as in support of Foreign Internal Defense (FID) medical training.

The innovative and wearable SMRT™ Moulage Task Trainers from Strategic Medical Research & Training™ create an unmatched experience of realism featuring realistic moulage and active bleeding across a wide spectrum of woundings and interventions. Made with durable materials and designed for a “one size fits most” range of limb and body sizes, the SMRT™ Moulage Task Trainers are engineered to work with live role players as well as to augment existing simulation systems—while allowing flexibility in placement and utilization. All SMRT™ Moulage Task Trainers work with SMRT™ Trauma Tables, SMRT™ Bleeding Systems, and common hydration systems (all sold separately), making them standalone and ready to use, while also allowing ease of integration into existing training systems. Utilized by Military, Law Enforcement, EMS, and Hospitals to create unsurpassed realism in hemorrhage control training, SMRT™ Training Aids are realistic, cost effective, highly mobile, durable, and low maintenance.
