Tactical Operation
Medical Manikin SERIES

TOMManikin®

BASIC | BLAST | GSW | WATER | BURN | CBRNE | FEMALE

Rugged, state-of-the-art training simulators, NAR Simulation's TOMManikin® Series provides the comprehensive solution for enhanced training in Tactical Combat Casualty Care (TCCC) from Point of Injury to transfer of higher care!

- **All-in-one, hyper-realistic trauma simulation solution** enabling instructors to build multiple realistic traumatic casualty scenarios with reactive patients
Ideal for use in classroom settings, trauma lanes and field training scenarios
- **Multiple, interchangeable extremities** present a variety of wounding patterns to provide full mission profiles in combat scenarios and disaster/mass casualty re-creations
- **Solid metal bones and joints** constructed of welded steel for unparalleled durability and quick exchange leg joints for flexibility in the most austere environments
- **Proprietary silicone skins** available in light, medium or dark skin tones that will not break down during prolonged UV exposure or extreme temperatures
- **160-190 lb manikin** provides extremities capable of withstanding up to 6,000 lb of pressure - Ideal for building collapse/entrapment training scenarios beyond conventional exercises
- **Ruggedized remote controls** provide simultaneous long-range communications with multiple NAR Simulation devices all from a single device!
- **TOMManikin®, TAMikin®, TCCC Man and K-9** simulators all include **3-year WARRANTY**

SPECIAL FEATURES

Interactive Animatronics:

- Lifelike Breathing Mechanisms
- Functional Anatomical Airway
- Variable Radial Pulse Rates & Pressure
- High Fidelity Bleeding from Multiple Wounds
- Customizable, Multi-language Voice Tracks
- Rugged Softech® Skin in a variety of skin tones

Wireless Controls:

- Wireless Remote NAR Simulation Instructor Tablet & Software
- Stand alone point-to-point communications with .5 mile line of site range

Flexible Wound Configurations:

Basic | Blast | GSW | Water | Burn | CBRNE

Custom configurations including Female Anatomy on request

Clinical Interventions available on ALL TOMManikins:

MASSIVE HEMORRHAGE:

- **Tourniquet Application** (proximal, junctional & abdominal)
- **Active Bleeding Control** by Direct Pressure on Pressure Points
- **Wound Packing**

ADVANCED AIRWAY:

- **Nasopharyngeal/Oral/Supraglottic Airway** Insertion
- **Endotracheal Intubation**
- **Surgical Airway** and **Tissue Dissection** with Realistic Bleeding

RESPIRATIONS:

- **Chest Seal Application**
- **Bilateral Needle Decompression**
- **Chest Tube Capable**

CIRCULATION:

- **CPR Chest Compressions**
- **Antecubital IV Access** on uninjured upper limbs
- **IO Access** (sternal, humeral, & tibial)

NORTH AMERICAN RESCUE®
Simulation

Every TOMManikin® includes:

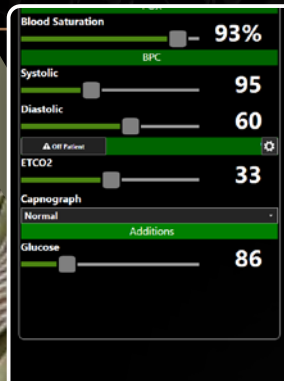

ACCESSORY KIT

- 2 x NiMH rechargeable batteries (5-amp & 10-amp) with independent chargers
- 1 x T-handle wrench
- Replacement connectors
- 5-pack of surgical airway neck skins (35 op sites)
- 8 oz. concentrated sim blood
- 2.5 gal. blood fill bottle
- NAR Simulation Instructor Tablet
- 1 x NAR® IFAK

- Instructor-worn 2-way communications headset
- 2 x Three-wheeled transport and storage carriers designed for TOMM

UNIFORM

- Berry Compliant
- Digital pattern
- Shirt features hook and loop sleeves and lateral seams
- Pants feature hook and loop inseam and lateral seams

NAR SIMULATION INSTRUCTOR TABLET with Scenario Preset Builder Software

Features:

- Features proprietary communication link that requires NO Wi-Fi, Bluetooth, or LAN connections
- Simultaneous long-range communications with numerous NAR Simulation devices
- NO interference risk with telemetry, avionics, or weapon systems

BASIC TOMManikin®

- **Tourniquet Application** (proximal, junctional, and abdominal tourniquets)
- **Active bleeding** controllable by **direct pressure** on pressure points
- **Wound packing** with realistic bleeding control
- **Nasopharyngeal and oral airways, supraglottic airway** insertion and **endotracheal intubation**
- **Surgical airway** with realistic bleeding and tissue dissection 35 operative sites included
- Remote controlled **breathing rates**: Slow, Normal, and Fast
- **Bilateral Needle Decompression** at either 2nd/3rd intercostal (mid- clavicular), or 5th/6th intercostal (mid-axillary) locations
- Realistic **chest seal application & adhesion**
- **Chest Tube** capable (bilateral)
- **Radial pulses** in uninjured upper extremities & bilateral carotid pulses
- **CPR Chest Compressions**
- **Variable pulse rate & pressure** (Normal, bounding, thready)
- Anterior and Posterior **Crepitus Hip / Pelvic Binder** Application
- **IV/IO access** (sternal, humeral, antecubital, tibial)

BASIC Wounding Patterns:

- 1. Partial Arm Amputation below the elbow** with Massive bleeding and dramatic soft tissue damage, exposed hard bone and discernible tissue layers Responds to tourniquet application or brachial artery direct pressure application
- 2. Full Amputation Leg** with massive bleeding, extensive soft tissue damage, exposed hard bone, visible tissue layers. Responds to direct junctional pressure and tourniquet application

*Other configurations and skin tones are available upon request

◀ **All Manikins include the NAR Simulation Instructor Tablet**

BASIC TOMMANIKIN® *

ITEM #	NSN #
93-0035	6910-01-705-3108

BLAST TOMManikin®

BLAST Wounding Patterns:

- 1. Open Jaw Fracture Head Skin** with massive maxillofacial bone and soft tissue injuries, actively bleeds. Supports OP/NP/ET/ Surgical airways
- 2. Packable Abdominal Evisceration** with intricate handcrafted attention to anatomical detail with visible tissue layers, and 10 in. of eviscerated bowel with peripheral ecchymosis surrounding large open wound. Massive bleeding with "clampable" vessel
- 3. Shrapnel Wound Arm** with active bleeding, multiple soft tissue wounds, responds to tourniquet application
- 4. Full Amputation Leg** with massive bleeding, extensive soft tissue damage, exposed hard bone, visible tissue layers. Responds to direct junctional pressure and tourniquet application

*Other configurations are available upon request

BLAST TOMMANIKIN® *

ITEM #	NSN #
93-0036	6910-01-705-3094

These products include 3-year manufacturer warranty

GSW (Gun Shot Wound) TOMManikin®

GSW Wounding Patterns:

1. GSW to Chest with anterior GSW entry & posterior exit. Actively bleeds from both locations. Anterior wound mixes with air from onboard compressor to create bubbling bleeding effect. Supports chest seal application and pleural needle decompression

2. GSW to Groin with GSW anterior entry/posterior exit with soft tissue trauma to penis and avulsed scrotum with prolapsed testicle. Wounds present with peripheral wound site ecchymosis, exposed sub-q fat layer and muscle striation. Entry wound is packable and responds to both peripheral and junctional tourniquet application and femoral pressure point application

3. GSW Leg with through & through GSW to leg above the knee. Entry wound presents with small entrance hole with circular powder burn. Exit wound has exposed fat and wound site ecchymosis. Variable bleeding rate. Responds to both peripheral and junctional tourniquet application and femoral pressure point application. Can be used as an impaled object using steel rebar, or wooden stake

4. Full Amputation Leg (Option)** with massive bleeding, extensive soft tissue damage, exposed hard bone, visible tissue layers. Responds to direct junctional pressure and tourniquet application

*Other configurations are available upon request

Addressing injury locations based on US Army study suggesting females who suffer penetrating injuries to chest, abdomen, pelvis have a higher mortality rates than male colleagues

TAMikin™ GSW

Female version of TOMManikin™ GSW, with anatomically correct female features and voice

- Injuries located in sensitive areas such as under breast & pubic area as well as the leg
- Parallels GSW TOMManikin's capabilities & wounding patterns

GSW TOMMANIKIN®*

OPTION	ITEM #	NSN #
GSW TOMM	93-0040	6910-01-705-2593

*Other configurations are available upon request

TCCC MAN® Simulator

Specifically designed for the application of skills and education utilizing protocols from Tactical Combat Casualty Care (TCCC)

TCCC Interventions Supported:

- Massive hemorrhage control (tourniquet application and wound packing)
- Chest seal application
- Airway management (NP/OP airways, supraglottic devices, endotracheal intubation)
- Tibial intraosseous site

Wounding Patterns:

- GSW to Chest** with anterior entry and mid-axillary exit wound
- Deep Packable** pelvic wound
- Full Amputation Leg** below the knee. Tourniquet responsive
- Unstable Pelvis** with palpable crepitus

TCCC MAN® Simulator

ITEM #

93-0958

At 150 lbs. with a welded steel frame, TCCC Man® withstands drops, falls, and drags.

K-9 Medical Simulator

See full set of included injuries at NARescue.com

K-9 Features:

- Welded steel frame, solid metal joints
- Expanded joint range of motion
- Multiple interventions supported, including Hemorrhage, CPR, Needle Decomp. and more.
- 5 interchangeable limbs with various injuries: Complete Amputation, Open Fracture, Soft Tissue Injuries, Road Rash/Burns, Penetrating Injury, & Evisceration
- Life-like airway
- Barks, Whines, Bleeds & Breathes
- 1L onboard blood capacity
- Wireless operation via NAR Simulation Instructor Tablet

K9 SIMULATOR

93-0027	6910-01-706-0307

BURN TOMManikin®

Wounding Patterns:

Burn Face** with 1st, 2nd, 3rd-degree burns to face that supports all airway adjuncts. *Head skin is interchangeable with other TOMManikins*

Burn Arms with 1st, 2nd, 3rd-degree circumferential burns to both arms

BURN TOMMANIKIN®*

ITEM #
93-0037

****Head skin is interchangeable with other TOMManikins**

CBRNE TOMManikin®

Wounding Patterns:

Burn Face* with 1st, 2nd, 3rd-degree burns to face that supports all airway adjuncts. *Head skin is interchangeable with other TOMManikins*

GSW to Chest with anterior GSW entry & posterior exit. Actively bleeds from both locations. Anterior wound mixes with air from onboard compressor to create bubbling bleeding effect. Supports chest seal application and pleural needle decompression

Abdominal Evisceration (Wearable Moulage) with intricate handcrafted attention to anatomical detail with visible tissue layers, and 10 in. of eviscerated bowel with peripheral ecchymosis surrounding large open wound. Massive bleeding with 'clampable' vessel.

GSW to Groin with GSW anterior entry/posterior exit with soft tissue trauma to penis and avulsed scrotum with prolapsed testicle. Wounds present with peripheral wound site ecchymosis, exposed sub-q fat layer and muscle striation. Entry wound is packable and responds to both peripheral and junctional tourniquet application and femoral pressure point application

CBRNE TOMMANIKIN®*
ITEM #
93-0038

**Other configurations are available upon request*

WATER TOMManikin®

Wounding Patterns: Partial Leg Amputation below the knee with massive soft tissue trauma and exposed hard bone, muscle and tissue layers.

Options:

GSW to Chest with anterior GSW entry & posterior exit. Actively bleeds from both locations. Anterior wound mixes with air from onboard compressor to create bubbling bleeding effect. Supports chest seal application and pleural needle decompression

-or-

Packable Abdominal Evisceration with intricate handcrafted attention to anatomical detail with visible tissue layers, and 10 in. of eviscerated bowel with peripheral ecchymosis surrounding large open wound. Massive bleeding with "clampable" vessel

Closed Fracture Arm with ecchymosis and palpable crepitus.

Right: Designed to be submerged up to 33 feet in either fresh or salt water

WATER TOMMANIKIN®*

OPTION	ITEM #
Basic	93-0041

**Other configurations are available upon request*

Above: Partial Arm Amputation (option available upon request)

MULTI-TOMMANIKIN®

with NAR Simulation
Instructor Tablet

3-year WARRANTY

Multi-TOMManikin® includes
3-year manufacturer warranty
from date of delivery

Rugged, state-of-the-art training simulators, NAR Simulation TOMManikin® Series provides the comprehensive solution for enhanced training in Tactical Combat Casualty Care (TCCC) from Point of Injury to transfer of higher care!

- **Multiple, interchangeable appendages** simulate gunshot wounds, blast injuries, burns, and more
- **Supports realistic mission profiles** for combat operations, disaster simulations, and mass casualty training

Features:

- Versatile Wounding Patterns
- Durable, Rugged Construction
- Advanced Remote Control & Feedback
- Field-Ready Power & Fluids
- Comprehensive Intervention Capabilities
- Voice & Communication
- Water-Resistant and Low Maintenance

TCCC Interventions Supported:

- Tourniquet application (proximal, junctional, abdominal)
- Wound packing with bleeding control
- Airway management (NPA, OPA, supraglottic, intubation, surgical airway)
- Bilateral needle decompression & chest tube insertion
- IV/IO access (sternal, humeral, antecubital, tibial)
- Radial and carotid pulses, variable rates and pressures

Discover more hyper-realistic **Training Simulators**
available at **NARescue.com** today!

Kit Includes:

- NAR Simulation Advanced Remote Tablet & Software
- 1.2 gallon onboard blood reservoir
- Pelican 1500 accessories case
- 12V NiMH batteries (5AH & 10AH) with smart chargers
- T-handle tool & fluid connectors
- Hook & loop training uniform
- NAR® IFAK
- 35 'bleeding' operative sites
- Instructor Bluetooth® headset
- TOMManikin® Operator's Manual

Injuries Included:

- Head: Uninjured Head Skin
- Chest: GSW Chest Skin with entry wound to right chest and exit wound to right axilla
- Right Arm: Uninjured Arm with Radial Pulse, IV and IO Access
- Left Arm: Uninjured Arm with Radial Pulse, IV and IO Access
- Pelvic: Injured Male Pelvic Skin with Avulsed Testicle, Packable GSW Entrance wound to Left Inguinal Area, exit wound to Left Buttocks
- Right Leg: Multiple configurations include – Uninjured Leg, GSW Injured leg, with true through-and-through entry and exit wound, Partial Amputation foot, Full Amputation above the knee
- Left Leg: Uninjured with Tibial IO access

Dimensions:

- Carrier Bags (2 x):
L 42 in. x W 24 in. x H 16 in.
- Assembled Manikin:
L 74 in. x W 24 in. x H 10 in.
- Accessories Pelican Case:
L 13.74 in. x W 11.63 in. x D 5.9 in.
- Weight: 160–190 lbs.
(configuration dependent)

MODULAR ASSEMBLY

Deluxe ALS KIT

Designed to simulate various vital signs for advanced life support monitoring and simulation

Features:

- Simulated NIBP cuff, SpO₂ finger probe, and ETCO₂ inline detector with waveform and digital value
- Simulated cardiac monitor screen with Lead II tracing rhythm
- ETCO₂ & SpO₂ waveforms, NIBP. Fully functional monitor screen for defibrillation/AED mode, alarms, and rhythm synchronization
- All student-visible values controlled via NAR Simulation Instructor tablet (included)
- NAR Simulation software includes exportable student evaluation performance documentation

Disconnect your student's dependency on instructor "over-the-shoulder" input

PATIENT MONITORING SUITE with NAR Simulation Instructor Tablet

NAR Simulation Patient Monitoring Suite of simulators can be used in all phases of patient care for any human (role-player), or ANY patient simulator

Features include:

- **NAR Simulation Capnograph Simulator**
Designed to be used as a mainstream carbon dioxide monitor that can be connected in-line with a mask or tube. Simulator displays include carbon dioxide partial pressure, respiratory rate and CO₂ waveform.
- **NAR Simulation Pulse Oximeter Simulator**
Utilizes the widely used finger-style probe for monitoring blood oxygen saturation. Simulator display includes Heart Rate, SpO₂ and SpO₂ waveforms.
- **NAR Simulation NIBP Monitor Simulator**
Designed to replicate a portable NIBP monitor. This simulator allows medical responders to gather vital signs without instructor intervention. Onboard controls allow various modes of operation. Display includes systolic & diastolic pressures (mmHg) and heart rate.

Capnography

Pulse OX

Non Invasive BP Cuff

PATIENT MONITORING SUITE

ITEM #

93-0071

Includes NAR Simulation Instructor Tablet

MOBILE FEEDBACK SYSTEM *requires AC power

Standalone mobile platform to capture simulation events*

Features include:

- Pelican 1650 case with custom-cut foam to protect all system components
- 2 x Cameras
- 2 x 72 in. Telescopic Tripods with camera mounts
- 3 x Terabyte stand-alone recorder
- 1 x NAR Simulation Instructor Tablet for wireless communications
- Proprietary software with instructor bookmark/replay feature, simulator status capture, trainee biometric capture, trainee evaluation software (exportable reports)
- 2 x 25 ft. CAT-6 retractable cord reels
- Trainee-worn stress monitor
- Features streaming participant heart and respiratory rate

Features:

- Student wearable system that allows instructors to "live monitor" up to 4 students' heart and respiratory rates
- 4 student kit w/puck, harness & software
- Includes monitor 'pucks', charging cradles, harness, and USB cables
- Requires NAR Tablet and software (not included)

MOBILE FEEDBACK SYSTEM

WEARABLE TRAINEE STRESS MONITOR
ITEM #
 93-0273

WEARABLE TRAINEE STRESS MONITOR

AIR BLAST Simulator

Features:

- Portable system utilizes compressed air to create a simulated blast effect.
- All components housed in a waterproof hard shell case
- Safe for indoor use
- Eco-friendly
- Built-in compressor
- Onboard rechargeable battery and charging system included.

AIR BLAST SIMULATOR

ITEM

93-0291

SENSORY CONTROL UNIT *without camera*

Built as a rack system, the SCU is self-contained, easily transportable, and will configure to most training environments, especially stationary units (e.g. cargo container and kill houses). The system is completely reusable and easily reset so that training iterations can be run with minimal interruption.

The SCU contains the hardware, software and electrical components required to equip multi-sized simulation environments for a training procedure. To recreate the realism of extrication under fire, the training operator can introduce into the training structure (laptop Master Controller or NAR Simulation Tablet) varying intensity of light, smoke (foggers), wind, and sound.

This platform supports the addition of cameras.

SENSORY CONTROL UNIT

ITEM

93-0279

Features:

- 2 hard cases for cables and wireless control devices.
- Upgrade capability for NAR Simulation Video Management System.

Contents:

- **LED light set (x2)**
 - Wireless control
 - Six brilliant amber, blue, red, and white LEDs
 - Clear optic hard-coated polycarbonate lens
 - Stand included
- **Fogger (x1)**
 - Wireless Control
 - Water-based fog/smoke
 - .9-gallon capacity
 - Low fluid indicator
 - Output 20,000 CFM
 - Features low fluid light indicator
 - LED-illuminated tank
 - Automatic shutdown
- **Blower (x1)**
 - Wireless control
 - 3-speed output (2600-4000 CFM)
 - 1HP
- **Loudspeakers (2x)**
 - Wireless control of volume and soundtracks
 - Built-in 1000W amplifier (2000W peak – 1000 continuous)
 - Output: 127dB
- **Air blast simulator (x1)**
- **NAR Simulation Instructor Tablet (x1)**

The NAR Simulation tablet is a ruggedized tablet that communicates with multiple NAR Simulation devices via Bluetooth to ZigBee relay.

MOBILE ENVIRONMENT CONTROL UNIT

with NAR Simulation Instructor Tablet

MECU is designed for mobility, and can be set up in a variety of training areas. This is a great option for smaller scale simulation events where dedicated training facilities are not available.

Features: & Contents:

- 2 hard cases for cables and wireless control devices.
- LED light set (x1)
- Fogger (x1)
- Blower (x1)
- Loudspeakers (x2)
- NAR Simulation Instructor Tablet with proprietary NAR Simulation Advanced Remote software

MOBILE ENVIRONMENT CONTROL UNIT

Environments

H-60 | CV-22 | MH-6 | SIMULATION CENTER

CASEVAC SIMULATOR H-60

The NAR Simulation H-60 is a portable, and reusable helicopter cabin structure built for providing realism to combat medical training without heavy demand on personnel.

NAR Simulation H-60 provides the capability to train appropriate personnel on the proper methods of administering medical aid to occupants from the interior of a structure within the parameters of a training exercise.

Features:

- Equipped with Sensory Control Unit and NAR Simulation Instructor Tablet
- Allows for combat configuration of equipment
- Train combat loading multiple patients
- Allows for loading patients from Point of Injury
- Simulate treatment during transportation
- Compatible with Fries Bar attachment*

Add'l Options Available:

- Fries Bar
- Blackout Window Kit
- ICS Box (Includes 2 headsets and 15 ft. PTT cables)
- Add'l Headset (w/ 15 ft. PTT cable)

Dimensions:

L 25 ft. x H 8.5 ft. x W 6.75 ft.

Weight: 2200 LBS

*Fries Bar attachment available for H-60. Visit NARescue.com for more info. ▶

NEW H-60 Cockpit with Realistic Pilot/Co-Pilot Seats and Graphics Panel

3-year WARRANTY

**CASEVAC H-60 & CV-22 Simulators
include 3-year manufacturer
warranty from date of delivery**

CASEVAC SIMULATOR CV-22

The CV-22T simulator is used to increase efficiencies during the initial point of injury and tactical evacuations phase of care. This advanced simulator provides a variety of options that enhance the simulated battlefield at any location.

Features:

- Equipped with removable, Sensory Control Unit and NAR Simulation Instructor Tablet
- Allows each unit to configure to Standard Operating Procedures
- Cabin height, width, and length to realistic sizes
- Day or night operations
- Treatment platform for CASEVAC training
- Used as a CV-22 crash site
- Black out during daytime operations
- Realistic crew securing landmarks
- Patients can be properly secured on floor
- Reinforced floor rings

Specs & Dimensions:

- A mobile (DOT licensed) trailer that replicates characteristics of CV-22 aircraft
- Tandem Axle design
- Maximum Weight is 14,000 lbs
- Trailer length 35' 7"
- Trailer width 8' 9"
- Trailer height 9' 3"
- Ramp opening trailer for on and off load of patients
- Ramp length will not exceed 7 feet
- Ramp width will not exceed 70 inches
- Interior: L 21 ft. x W 62 in. x H 72 in

Add'l Options Available:

- ICS Box (Includes 2 headsets and 15 ft. PTT cables)
- Add'l Headset (w/ 15 ft. PTT cable)
- Litter Stanchions (set of 2)
- Blackout Kit
- Crew Seats

LITTLE BIRD **MH-6**

The Little Bird is a portable (reusable), MH-6 size helicopter cabin simulator. It provides a realistic, multi-purpose, platform that accurately depicts real-life extrication situations and enhances medical training in crash scenarios.

The Little Bird, used in conjunction with the TOMManikin® and Sensory Control Unit (SCU), provides total integration between the simulated cabin and the environmental factors that can be applied to enhance any training scenario.

The front compartment features an entanglement trap for the TOMManikin (both pilot and co-pilot). Little Bird has "extractable" doors, providing a realistic obstacle to emergency extractions. To add a sense of stress and the element of surprise to the care-under-fire and extraction experience, the portable NAR Simulation Sensory Control Unit (SCU) applies environmental distractions to a training scenario. Remotely controlled via an included NAR Simulation Instructor Tablet, training cadre can introduce and vary the intensity of noise and smoke (fogger).

Features:

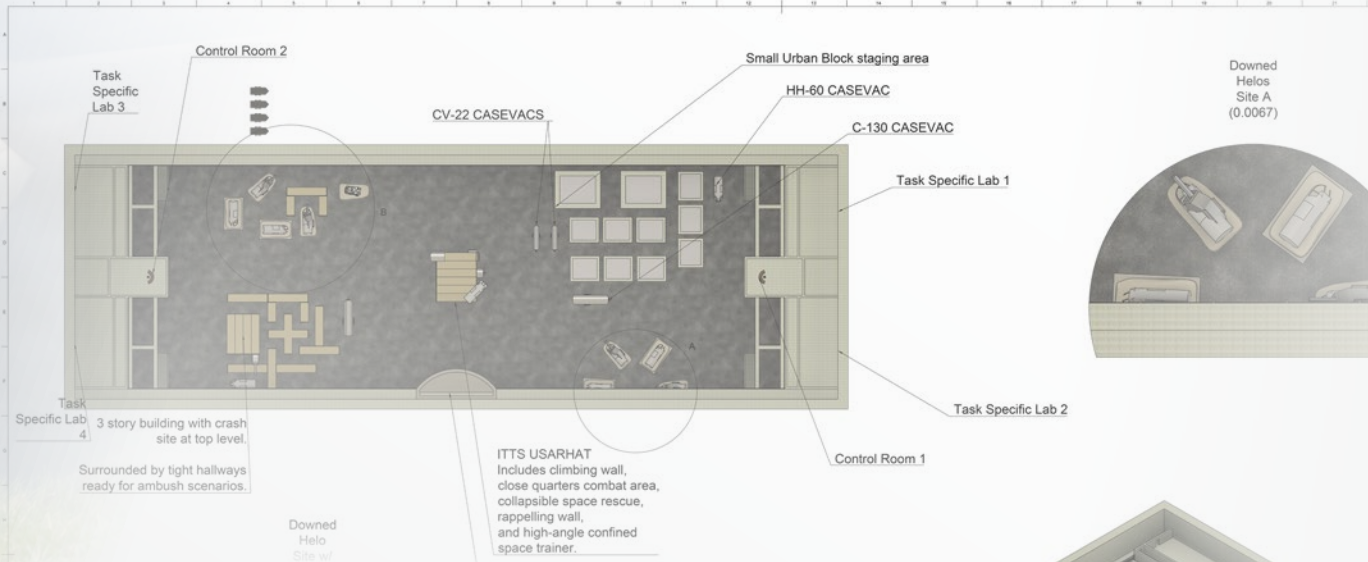

- Realistic crew securing landmarks, allowing securing of patients
- Reinforced Rings
- Internal fuel tank
- Day or night operations
- High-powered amplifier and speakers to simulate aircraft noise
- High-powered fans simulate rotor wash
- Aircraft lighting (white, green/ blue)
- Sensory Control Unit included
- All functions are controlled via a NAR Simulation Instructor Tablet (included)
- Submersible version available for aquatic environments

Dimensions:

L 12 ft. x H 7 ft. x W 6 ft. | Weight: 700 Lbs.

MH-6 LITTLE BIRD TRAINING SIMULATOR

OPTION	ITEM #	NSN#
MH-6	93-0295	---

SIMULATION CENTER

NAR Simulation specializes in working closely with customers who have unique training and simulation training center requirements. We engineer custom, scalable, experiential learning environments from concept design through installation and on-site training.

Simultaneous integration of multiple NAR Simulation products and devices create environmentally realistic scenario settings. From care in the streets/POI care, mass-casualty triage, prolonged field care and complex medical/surgical case management, our solutions provide the capability to train personnel in a safe, reproducible environment.

Simulation Center Features:*

- Portable, reusable training systems that enhance the realism of combat medical training without heavy demand on personnel.
- Enhances stress inoculation capabilities while training personnel proper methods of administering medical aid to casualties from the interior of any structure, or within the parameters of a training exercise.
- Simultaneous control of all NAR Simulation devices from a single control point.
- Welded Steel Frames
- Numerous options available for faux wall styles (Wood, Brick, Stone, etc.)
- Multiple cameras to capture student performance
- Video playback software with bookmarking and annotation features

*Simulation centers are custom built. Options vary depending on customer's unique needs and budget. Contact NAR Simulation for more information.

10 PK - TOMManikin®

BLEEDING NECK SKINS

- Features embedded blood channels that simulate bleeding with tissue dissection.
- 70 operative sites within each ten pack.
- Works with Cric in a Box™ Simulator

TOMMANIKIN® BLEEDING NECK SKINS - 10 PK

ITEM #

93-0102

SPECIFICATIONS

Packaged - H 10 in. x W 6 in. x L 12 in.
Weight: 5 lbs

NON-BLEED

TOMManikin® Replacement Neck Skins - 10 PK

- Features 100% skin tone silicone
- Dark red simulated tissue layer visible upon dissection.

TOMMANIKIN® REPLACEMENT NECK SKINS NON-BLEED - 10 PK

ITEM #

93-0147

SPECIFICATIONS

Packaged - H 10 in. x W 6 in. x L 12 in.
Weight: 3 lbs 1.1 oz
