

RESCUE RESPONDER SIDE ARMOR SET

REV2018-09-19

Side Armor designed specifically for the Rescue Task Force Vest...

The Rescue Responder Side Armor Set is the cummerbund-style side Level IIIA soft armor providing increased lateral protection when used in conjunction with the MKII Soft Armor Vest.

The ballistic soft armor is comprised of a unique, multi-hit capable, patent-pending assembly of ballistic materials that capture projectiles and disperse the energy over the entire surface of the panel.

It's two adjustable panels together accommodate up to a 62 in. waist and feature MOLLE capability that allows for the attachment of additional medical or extraction equipment as needed. For additional lateral protection, hard side plates (not included) can be added via its integrated pouches.

Technical Specifications:

- Complies with and exceeds NIJ Ballistic Resistance Standard 0101.06 for ballistic performance of Level IIIA body armor
- Side hard armor plate pouches for increased protection (plates not included)
- Proprietary assembly of ballistic materials
- Upgradeable to Level III/IV protection with the addition of hard plates (not included)

Dimensions:

- Each Panel:: H 8 in. x W 28 in. x D 0.5 in.
- Cummerbund coverage area: H 7 in. x L 62 in.
- Maximum Waist Measurement: 62 in.
- Total Weight: 4 lb 7 oz

*Note: Side Armor Only,
Vest is not Included*

Side Pouches/Plates sold separately
