ETAK W/ TEAR AWAY PANEL

(Enhanced Trauma Aid Kit)

Point-of-wounding IFAK for the Assault Vest or Body Armor

The ETAK (Enhanced Trauma Aid Kit) features a durable nylon bag with detachable back panel and convenient 550 cord pulls.

This compact IFAK bag was designed to be accessible from a belt, duty belt, or any equipment with PALS/MOLLE attachment points. The multiple interior elastic loops keep

your kit organized and secure. A tear away panel enhances

the range of mobility for your kit during chaotic situations. The innovative carriage option maximizes storage space while maintaining a compact profile allowing ease of access to essential equipment for point-of-wounding and self-aid/buddy-aid care to address penetrating, blast or other traumatic injuries.

The ETAK is intended to pair with a separate C-A-T Tourniquet and holder (not included). This makes a great option for those individuals that already own a tourniquet / holder option, but just want to add more capability to what they carry. By stowing the tourniquet in its own holder, critical medical gear can be distributed in a smaller, more compact ETAK bag separately.

ETAK W/ TEAR AWAY PANEL
