

K9 BARK

BATTLEFIELD AND RECOVERY KIT

Mission Ready. Engineered to Deliver.

The K9 BARK™ (Battlefield Aid and Recovery Kit) is a mission-ready canine trauma system engineered to deliver comprehensive point-of-injury care in accordance with the Joint Trauma System (JTS) K9 Tactical Combat Casualty Care (K9TCCC) Guidelines. Purpose built as a hybrid of the proven NAR Mini Medic and NAR Squad Kit Gen 2 platforms, the K9 BARK combines a compact, streamlined design with expanded treatment capability to meet the demands of military, law enforcement, and tactical working dog operations.

Designed for intuitive access under stress, the upper compartment is dedicated to advanced Tier 3/4 interventions, while the lower compartment contains critical Tier 1/2 equipment for immediate lifesaving care. This deliberate organization enables providers to rapidly identify and deploy the appropriate equipment throughout every phase of K9 casualty management, improving efficiency when seconds matter.

From initial lifesaving interventions to advanced battlefield treatment and casualty recovery, the K9 BARK provides operators, handlers, and medics with a single, scalable solution for tactical K9 medical care. Whether supporting military working dogs, law enforcement K9 teams, or search and rescue canines, the K9 BARK delivers the capability, organization, and confidence needed to care for America's four-legged partners in the most demanding operational environments.

FEATURES/SPECIFICATIONS
