

NANO BAG

BELT & MOLLE

Bag only version of the NANO IFAK.

The Nano has two mounting options – featuring a belt mounting slot for a duty belt or MOLLE for compatible plate carriers or other gear:

The Belt mount features a simple, lightweight, and durable way to quickly attach the Nano to any duty belt or pants belt 2 in. or smaller. Constructed out of Blue Force Gear's ULTRAcamp high-performance coated fabric laminate, the backer offers a stiff yet low-profile and reliable mounting solution for either horizontal or vertical carry.

The MOLLE attachment features Blue Force Gear's two-way Helium Whisper attachment system that allows for pouch mounting both vertically and horizontally. BFG's patented Helium Whisper attachment system is the lightest and strongest MOLLE style attachment system available and is the choice of the most elite professionals.
