

K9 MINI MEDIC KIT

Your K-9 partner would defend you with his life; don't leave his to chance.

The K9 Mini Medic Kit provides a compact, versatile platform equipped with the essential medical equipment to treat multiple traumatic injuries, such as penetrating and blast-type wounds, which are common to K9s and their handlers in their operational arenas. The K9 specific gear enables handlers to render care to an injured canine when veterinary care is not immediately available.

This optimally sized Mini Medic bag features external pouches and side/bottom MOLLE to allow for external tourniquet or other attachment options. A large pouch on back panel includes a drop-down pouch with abrasive resistant padded bottom providing extra storage for more gear such as compact breaching tools. It's external expansion zipper allows for increased load capacity if needed. The inside of the bag has two small and one large, clear tear-away pouches for medical or other equipment supply storage. Along with two mesh inner pouches and an internal pouch on the inner lid, many storage options exist.

FEATURES/SPECIFICATIONS

- Compact, multi-purpose trauma aid bag with life-saving trauma equipment and K9 specific gear for point of wounding treatment of multiple traumatic injuries
- K9 specific gear enables handlers to render care to an injured canine when veterinary care is not immediately available
