USCG JOINT FIRST AID KIT (JFAK)

Learn more* about this and other *Products with a Mission*® at *www.NARescue.com

The Joint First Aid Kit (JFAK) from North American Rescue® is a low-profile, compact tactical medical kit designed for rapid response to life-threatening injuries. Built to meet the stringent requirements of the United States Coast Guard, this mission-ready IFAK integrates easily into any loadout—stow it inside an aid bag or mount it to body armor, assault vests, or packs using MOLLE/PALS-compatible webbing.

Configured to address the leading causes of preventable death in combat, the JFAK includes a C-A-T® Tourniquet, trauma dressings, Combat Gauze hemostatic, and gauze for massive hemorrhage control; a nasopharyngeal airway for airway management; and the Enhanced ARS for treatment of tension pneumothorax. Additional components—nitrile gloves, eye shield, trauma shears, and a combat casualty card—support efficient casualty care in austere and high-threat environments.

Durable, modular, and streamlined, this tactical IFAK ensures critical medical supplies are accessible when seconds matter—bridging the gap between point-of-injury care and advanced medical support.

FEATURES/SPECIFICATIONS

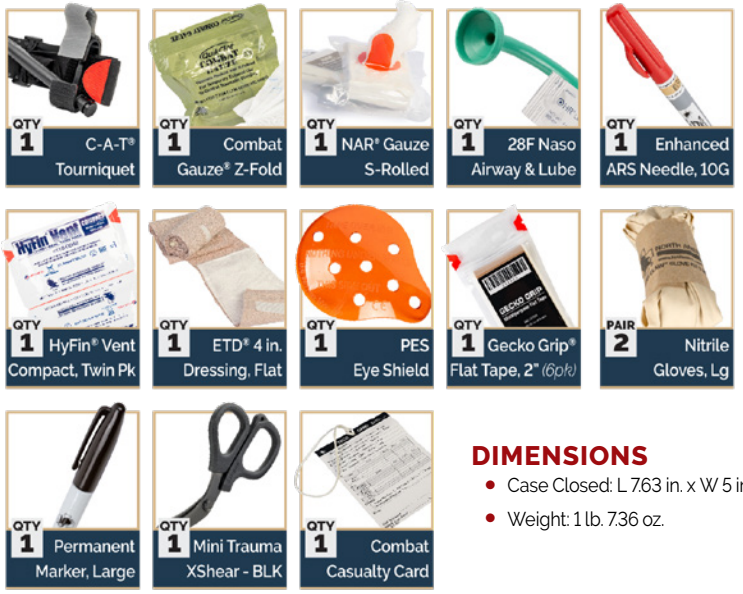

- Durable 500D Nylon
- Sand & water resistant, self-repairing zipper with silent 550 cord pulls
- MOLLE-style Attachment System Compatible
- Sleek Design with no Front Pocket
