RAVEN MODEL 90C

BIFOLD LITTER

Learn more* about this and other *Products with a Mission*® at *www.NARescue.com

Official Litter for the U.S. NAVY.

The challenge for cross-capability between Homeland Security and the Department of Defense was "mission possible" for North American Rescue. We designed the Raven® Model 90C as a cost-effective aid for rescuers faced with the challenges of natural disasters and domestic terrorism.

Our unique solution includes such important features as bi-fold design, and durable construction for reliable long-term storage. The stretcher allows immediate evacuation on DOD aircraft and integration into DOD medical treatment facilities. Importantly, it also works as a treatment table at remote locations in all environments. The Raven® 90C has been tested for chemical warfare agents.

Raven® 90C also has a family of support items such as IV poles, stretcher stands, and backrest.
