

# TOMAHAWK MC *Multicolor Tactical Lights*

## Combat Specific Lighting Tools...

In response to the growing, and to this point, unmet need from tactical medical professionals, NAR is proud to offer the latest innovation from First Light USA® - the industry leader in combat-specific lighting tools.

The Tomahawk® MultiColor (MC) Series of hands-free tactical lights are specially designed to provide maximum versatility and enhanced illumination at the point of injury. The hands-free design adds a unique set of features specifically engineered to assist the Combat Medic— from the superior chest mounting capability and full 180° adjustability of the light source to the proprietary mix of red and green LEDs that “highlight” blood for immediate wound identification in multi-fluid situations.

This not only provides Medics with a quick tool to accurately assess a casualty in low light/night time conditions, it allows them to maintain light discipline as well as a defensible position.

### Features:

- Right angle tactical light with rotating head and 3 button control panel for one-handed thumb actuation
- Provides White, Red, Green, and Red+Green LED mix for highlighting blood during casualty treatment
