PROLONGED FIELD CARE

The ideal PFC Kit for both major & minor surgical procedures in less than ideal or highly mobile environments

The R-SICK was specifically designed as a flexible austere and prolonged field care surgical instrument storage and recovery system tray sequentially set up to prepare the proceduralists for rapid **"incision, spreading, damage control, and closure."** Complex, emergent procedures—**surgical airways, hemorrhage control, field amputation, and REBOA**—are catalysts to the R-SICK design; however, the demand for rapidly-deployable field instruments has always existed. The R-SICK was created for operator personalization and to facilitate mitigation of time-sensitive injuries. The R-SICK was designed with mission ready materials needed for the difficulties that lie ahead. Available in both **Floor Grade and OR Grade quality instruments** that can be sterilized by the clinician as needed.

Features:

- Flexible austere and prolonged field care surgical instrument storage and recovery system tray
- For both major and minor surgical procedures in less than ideal or highly mobile environments
- Sequentially set up for rapid "incision, spreading, damage control, and closure"
- Ideal for complex, emergent procedures such as surgical airways, hemorrhage control, field amputation, and REBOA

Specifications:

- Packaged:
H 8 in. x W 7 in. x D 3.5 in.
- Weight: 3 lb
