Green Colored Needle Hub Training Version

The EZ-IO[®] Intraosseous Infusion System provides the medical professional immediate vascular access to the central circulation within seconds, delivering medications, intravenous fluids and blood products to adult and pediatric patients. It is the leading choice for intraosseous access across multiple health care settings, and is used by 90 percent of US advanced life support ambulances, over half of US Emergency Departments, and the US Military

The EZ-IO[®] Manual Sternal Training Needle Set allows medical personnel to train in the sternal site for the immediate manual securing of vascular access. Its unique green coloring provides an immediate visual clue that they are only intended for training purposes. The manual sternal trainer needle version features the same weight and dimensions as the tactical use versions so trainees and medical personnel can familiarize themselves with the proper use and techniques required for in-field applications.

Features:

- Unique green color indicates a device intended for training
- For training in the sternal site for easily accessible insertion
- Device is silent and well adapted for confined space
- Requires minimal pressure

Dimensions:

- Packaged: L 6 in. x W 3.25 in
- Weight: 1.4 oz
