STOP THE BLEED is a service mark of the Department of Defense
Public Access Bleeding Control

Life threatening bleeding can occur from everyday emergencies such as vehicle crashes, incidents involving farming equipment or public transportation, accidental injuries from natural disasters like tornadoes, and inflicted injuries from man-made disasters such as shootings and bombings.

The small, durable Individual Bleeding Control Kit by North American Rescue is designed to provide essential equipment that can be utilized by the general public to take action as immediate responders in stopping life threatening bleeding.

- Available in either a nylon carry bag or vacuum-sealed pouch.
- Includes step-by-step illustrated “Just in Time” pictorial instructions that enable even the untrained provider to help save lives.
- Available in Basic, Intermediate and Advanced configurations.

Basic 1 Individual Bleeding Control Kit
- Provides life saving equipment such as tourniquets, pressure dressings, and gauze bandages designed to stop major bleeding.
- Convenient kits empower the public to help control bleeding and save lives.

Public Access Bleeding Control Packs

Save lives by stopping life threatening bleeding in the first critical minutes.

Uncontrolled bleeding can result in death within minutes—even before emergency medical services or other emergency responders can arrive. The first minutes following a traumatic injury are crucial in saving a life.

- Provide bystanders and initial first responders with essential medical equipment to take action to stop life threatening bleeding.
- Includes eight (8) individual Bleeding Control Kits (either nylon bags or vacuum-sealed pouches) that are contained inside of an easy-to-open carrying case.
- Includes one (1) NAR QuikLitter® used for moving injured casualties.

Public Access Bleeding Control Pack  
Nylon Bags

Rip-stop nylon bags with critical care equipment.

Equip bystanders to apply a tourniquet or pressure dressing and stop life threatening bleeding.

Basic 80-0460  
Intermediate 80-0461  
Advanced 80-0462

Public Access Bleeding Control Pack  
Vacuum-Sealed Pouches

Vacuum-sealed pouches are held in the carrier with elastic straps.

Options Item#  
Basic 80-0468  
Intermediate 80-0469  
Advanced 80-0470

Public Access Bleeding Control Pack  
Vacuum-sealed Pouches

Cost effective alternative to nylon.

All of the same great equipment as the nylon bag version, but each individual kit is vacuum-sealed in an airtight, moisture resistant pouch.

Public Access

Bleeding Control Station

Modular aid components contained in an easy-access wall case and designed for immediate bleeding control during emergency situations in public buildings and populated public areas.

- Each NAR Public Access Bleeding Control Station contains one (1) Public Access Bleeding Control Pack (includes 8 Individual Bleeding Control Kits & 1 NAR QuikLitter™ in a foldable carrying case), and stored in a durable, clear polycarbonate cabinet that is easily accessible with highly visible “Stop the Bleed” placards for fast identification.
- The rugged storage case provides both physical and environmental protection, has rounded corners to prevent injury if bumped into, and has an eyelet for a secondary tamper-resistant seal (not included).
- Allows visibility at any angle and the external mounting tabs enable the case to be easily installed on any wall (mounting hardware included).
- Available in Basic, Intermediate, and Advanced care configurations.
- Individual Bleeding Control Kits are packed in Red Nylon Bags or Vacuum-sealed Pouches.

Public Access Station Wall Case Only
