## NORTH AMERICAN RESCUE'S IPOK RECOGNIZED AS "BEST OF THE BEST FOR 2012"

GREENVILLE, SC (*January 15, 2013*)– North American Rescue's Individual Patrol Officer's Kit (IPOK®) was recently selected by *Law Officer Magazine* as one of their "Best of the Best for 2012" products.

The IPOK was designed to provide personnel with a compact and durable individual hemorrhage control kit that treats bleeding from penetrating and other traumatic injuries. It features a C-A-T Tourniquet, Emergency Trauma Dressing, Black Talon nitrile gloves and either an s-rolled gauze or a hemostatic dressing of your choice (Celox, ChitoGauze or Combat Gauze). Packaged for small cube space and designed to fit into a BDU pocket, vest pouch or individual bag, the IPOK allows personnel to keep a compact bleeding control kit on their person, where it is needed most. The contents are vacuum sealed in a rugged, durable package that is easy to open.

The *Law Officer* product review team scrutinized the exhibit halls at the 2012 International Association of Police Chiefs (IACP) and California Patrol Officers Association CopsWest conferences looking for innovative products recent to the market. The result was a list of 11 products that were reviewed in an article written by Chris Boyd and featured in the November/December 2012 issue of the publication entitled, "Worthy Additions: New Products To Consider As You Head Into The New Year."

"We are honored to have the IPOK recognized as one of the 'Best of the Best for 2012' award recipients from *Law Officer Magazine*," stated North American Rescue's Director of Law Enforcement Products, Brent Bronson. "We believe that empowering first responders, health care professionals and tactical law enforcement and patrol officers to treat the leading causes of preventable death in tactical environments is vital."

North American Rescue (NAR), based in Greer, South Carolina, has proudly enjoyed the honor of serving their country, community, and customers for over a decade. NAR is leading the way in decreasing preventable deaths by providing innovative casualty care solutions to our uniformed soldiers, first responders, health care professionals, and security forces both at home, and abroad in foreign combat zones.
